

VAMSHI PERABOINA

AI/ML Engineer | Full Stack Developer

+91 9392893553 ◇ peraboinavamshiyadav@gmail.com ◇ Hyderabad ◇ [LinkedIn](#) ◇ [GitHub](#) ◇ [Portfolio](#)

PROFESSIONAL SUMMARY

Detail-oriented Software Developer with expertise in **Python** and modern web technologies including **HTML**, **CSS**, **JavaScript**, **Angular**, and **React**. Experienced in building scalable full stack applications using **Node.js** and **Flask**, emphasizing clean architecture, performance, and user-centric design. Possess hands-on experience in **Artificial Intelligence and Machine Learning**, including **Deep Learning** and **Computer Vision**, applying data-driven models to develop intelligent, real-world solutions. Passionate about delivering high-quality applications in fast-paced environments while continuously learning and embracing new technologies.

EDUCATION

Bachelor of Technology in Computer Science and Engineering - Artificial Intelligence and Machine Learning, Malla Reddy University, Hyderabad 2022 — 2026

- CGPA: 8.92

Board of Intermediate Education in Science, Telangana State Model School & Jr Collage 2020 — 2022

- Percentage: 77%

Secondary School of Education in General Education, Telangana State Model School & Jr Collage 2019 — 2020

- CGPA: 10.0

SKILLS

Programming Languages : Python, JavaScript

Web Technologies : HTML, CSS, MySQL, MongoDB

Frameworks, Libraries : React.js, AngularJS

AI/ML Techniques : Machine Learning, NLP, OpenCV, Computer Vision

Development Tools : GitHub, VS Code, REST APIs

PROJECTS

GUI-Based QR Code Generator Using Python [Link](#) Nov '25 — Dec '25

- Developed a **GUI-based QR Code Generator** using Python that allows users to generate QR codes for text and URLs with real-time input.
- Implemented QR code creation and image export functionality using Python libraries, ensuring fast, accurate, and reliable QR generation.

AI-Powered University Enquiry Chatbot Using Retrieval-Augmented Generation [Link](#) Sep '25 — Dec '25

- Developed an **AI-powered University Enquiry Chatbot using Retrieval-Augmented Generation (RAG)** to provide accurate, context-aware responses from university documents (PDFs).
- Implemented semantic search using **Sentence Transformers and vector embeddings**, enabling efficient information retrieval with improved answer relevance.
- Built an **end-to-end chatbot system using Python and Flask**, integrating document loading, embedding generation, and real-time user interaction.

Multi-Class News Classification [Link](#) Sep '24 — Dec '24

- Designed and implemented a **machine learning** model to classify news articles into categories such as **sports, politics, and technology**.
- Applied **NLP techniques** including **TF-IDF, text preprocessing, and supervised learning algorithms**.
- Improved model accuracy through **feature engineering, data cleaning, and hyperparameter tuning**.

ACHIEVEMENTS

Debugging and Paper Presentation Certificates Feb '24

Recognized for excellence in debugging challenges and effective paper presentations during academic activities.

CERTIFICATIONS

AICTE Internship – Successfully completed an AICTE-certified internship program.

Domain-Wise Certifications, in Artificial Intelligence, Machine Learning, Python Programming, and Full Stack Development through Coursera and Internshala, gaining hands-on experience in real-world applications and project-based learning.
